CLEAN WATERS AND SAV: MAKING THE CONNECTION

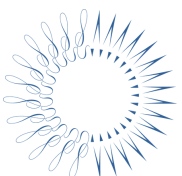

A technical workshop to develop water quality strategies to protect and restore submerged aquatic vegetation

Join other science and management professionals to develop specific actions to improve management of SAV habitat and the waters that sustain it. This information will directly inform the 2021 NC Coastal Habitat Protection Plan. We need your expertise to accomplish this! Come discuss the current status of SAV in NC, water quality management tools NC could consider, and to learn about management successes from Chesapeake Bay and Tampa Bay.

MARCH 4-5, 2020

NC Museum of Natural Sciences, Raleigh, NC | Lunch Provided
