Promoting the conservation of North Carolina's Natural Resources

Clean Water Management Trust Fund, One NC Naturally, and the Carolina Environmental Program: Diverse Agencies With Common Goals.

Go To Map Viewer Map Viewer Help ONCN About Us

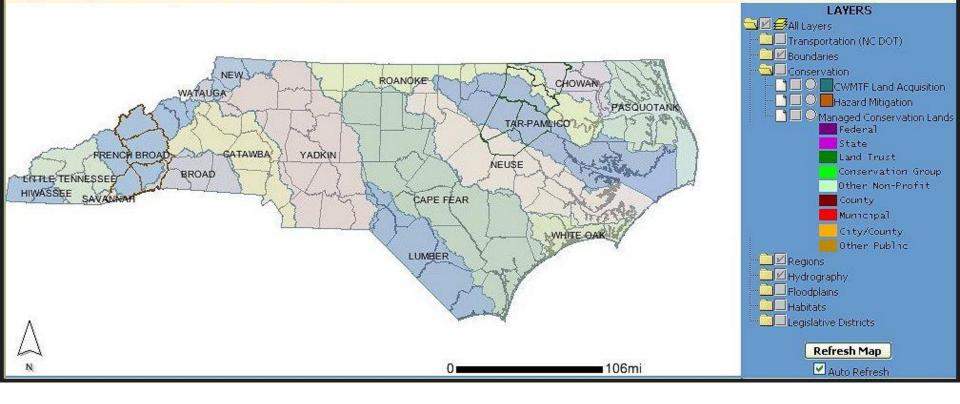

The One NC Naturally Program's mission is to lead in developing and implementing a comprehensive statewide conservation plan that involves the public, governmental agencies, private organizations, and landowners. ONCN's mandate is to maintain functional ecosystems, biological diversity and working landscapes through the stewardship of land and water resources, and to implement a plan that will conserve and restore the state's natural heritage and sustain a healthy life for all North Carolinians and visitors.

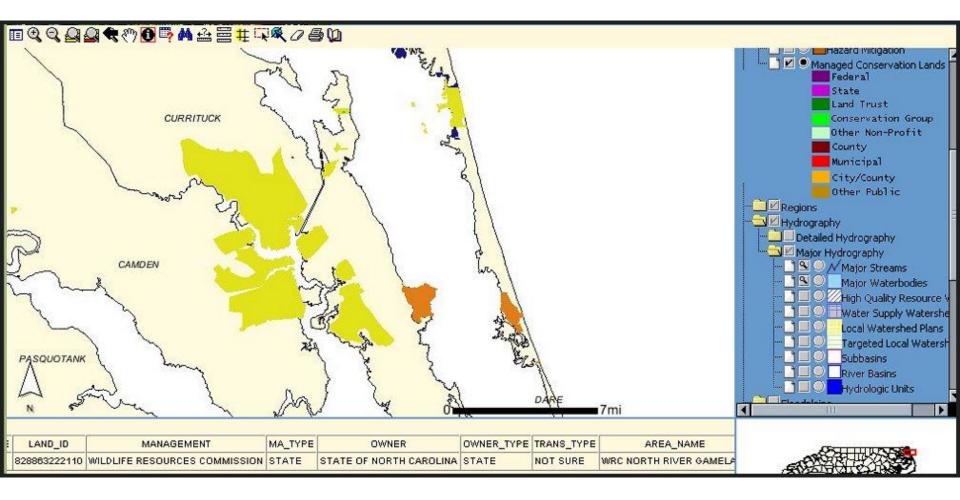

The Carolina Environmental Program's threefold mission is to act as the public face of all environmental programs on the UNC Chapel Hill campus, bring various programs together to tackle interdisciplinary environmental problems, and to create new interdisciplinary areas of study.

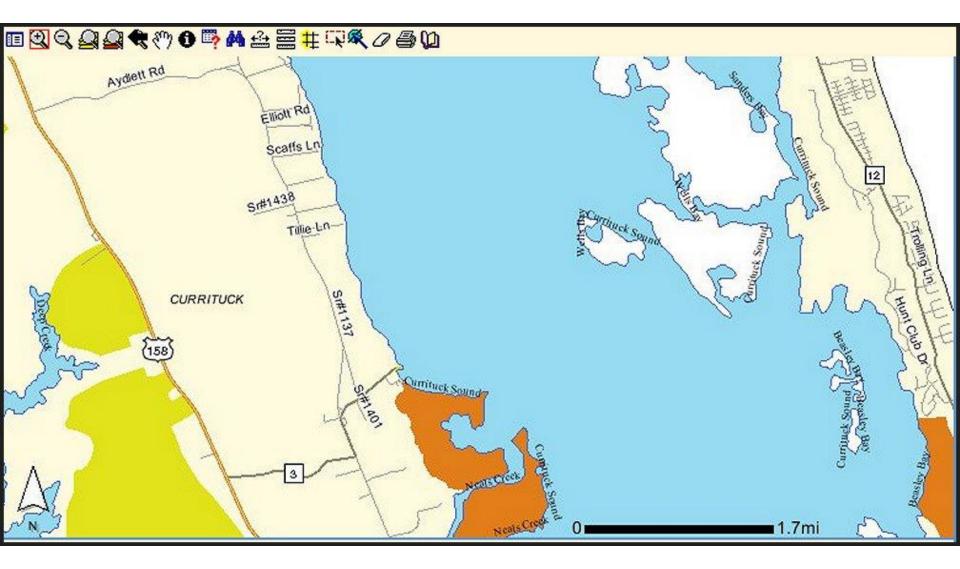

The Clean Water Management Trust Fund was established in 1996 to help finance projects that enhance or restore degraded waters, protect unpolluted waters, and/or contribute toward a network of riparian buffers and greenways. CWMTF estimates that more than \$10.5 billion is needed to protect and restore water quality in North Carolina.

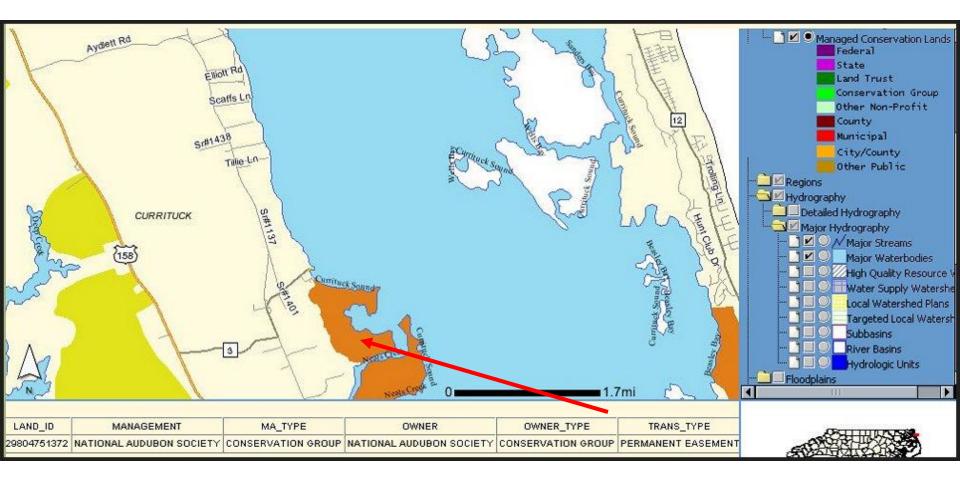

This online mapping viewer and database system will enable partners to track existing properties and target new ones for permanent preservation.

What do we have?

- NC OneMap in progress
- Map viewer in progress
- Regional data
 - inventories
 - plans
- Framework for maintenance and decision support

Benefits of ONCN Tools

- Common framework for planners, grant applicants and grant awarders
- Easier access to data for addressing local, regional, and statewide issues
- Spend your time discovering, analyzing, planning and making maps

Support and Leverage NC OneMap

Cost savings in data collection through regional and statewide approaches

Data consistency across jurisdictions

Much easier access to data for addressing local, regional, and statewide issues

Toolbar

The Web Application Toolbar contains all the tools and buttons offered in the map viewer. For more information on how to use these tools, click here: <u>Application Tools</u>.

<u>Back to Top</u>

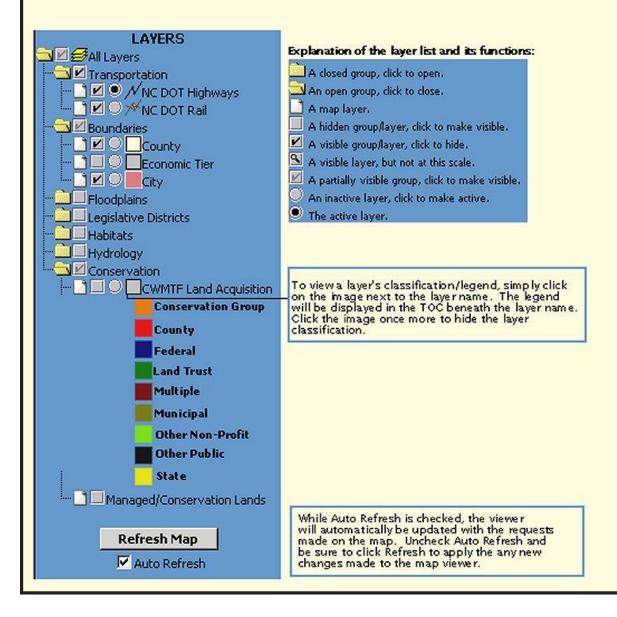

Map Frame

The map frame is the center window that contains that the map area that you are viewing. To zoom in and out or move around (panning) the map, see the <u>Application Tools</u>. If you receive an error while zooming in and out or panning the map, you should reload the viewer by clicking the 'Refresh Map' button (paste image here) located in the TOC/Layer List.

Layer List/Table of Contents (TOC)

Overview Map

The NC Conservation Lands Map Viewer overview map indicates the portion of the State that is currently being shown in the main map (Map Frame - create link here). This is depicted by a red rectangle. Also, you can quickly move to another area of the map by clicking around the overview map.

Back to Top

Identify & Query Frame

The Identify and Query Frame is used by several <u>Application Tools</u> to retrieve and disseminate information from and to you, the user.

🕄 Zoom In Tool

Use this tool to enlarge or show a greater detail of a portion of the map. This tool can be demonstrated in two ways.

Steps:

- 1. Select the tool.
- 2. Click and draw a box on the map around the area that you wish to see in more detail.

OR

1. Click on a point in the map without drawing a box. You will enlarge the area of the map around that point by a factor of 2.

The map will refresh and draw the zoomed in area.

Back to Top

🔍 Zoom Out

The Zoom Out Tools is the opposite of the Zoom In Tool. Use this tool to view a larger map area, but in less detail. Again, this tools can be demonstrated in two ways.

Steps:

- 1. Select the tool.
- 2. Click and draw a box on the map.

The map will redraw at a reduced scale. A smaller box will zoom out more than a larger box.

OR

1. Click on a point in the map without drawing a box. You will zoom out from the area of the map around that point by a factor of 2.
