

... the newsletter of the Albemarle-Pamlico Estuarine Study

Vol. 4, No. 1

December 1991

How the A/P Study works

As the A/P Study's Comprehensive Conservation and Management Plan is developed over the next year, it is important that the public understand the flow of authority and information within the Study. The chart below depicts the agencies and committees involved.

US EPA

Funds 17 studies nationwide though its National Estuary Program. Must approve final CCMP

STATE OF NORTH CAROLINA

Study is operated out of NC Dept. of Environment, Health, and Natural Resources. Must approve CCMP.

POLICY COMMITTEE

Made up of 12 members representing various interests. Must approve final CCMP before it goes to EPA and State. Study's primary decision-making body.

TECHNICAL COMMITTEE

Made up of 23 members representing various resource management agencies and other interests.

Recommends actions to PC on scientific and management issues and oversees daily operations of program.

STUDY STAFF

Randall Waite, Director; Jennifer Steel, Technical Coordinator; Joan Giordano, Public Involvement Coordinator; support staff. Conducts day-to-day operations of Study and is responsible for producing drafts of Study documents.

CITIZEN ADVISORY COMMS.

Two committees of 30 members each, one for Pamlico region, one for the Albemarle, representing a wide array of interest groups. CACs provide a conduit for public input on the direction of the Study.

THE ALBEMARLE-PAMLICO ESTUARINE STUDY

Initiated in 1987, the Albemarle-Pamlico Estuarine Study is a five-year program of research and education on the Albemarle and Pamlico sounds and the rivers that feed them. The Study is charged with developing a Comprehensive Conservation and Management Plan (CCMP) to help guide long-term environmental protection of the estuary. The schedule for the drafting, review and publication of the CCMP is as follows:

PROGRAM GOAL
CCMP target Environmental Goals set
CCMP workgroup meetings
First draft of CCMP
Public review of draft
Revisions to CCMP draft
Second draft of CCMP
Public review of CCMP draft
Final revisions to CCMP
Final CCMP approved and published
Implementation Summit

At left are members of the CCMP "workgroups" that will be identifying management alternatives for the A/P Study's Comprehensive Conservation and Management Plan (CCMP).

The workgroups are composed of the members of the Study's four major committees: Policy Committee (PC), Technical Committee (TC), Pamlico Citizens Advisory Committee (PCAC), and Albemarle Citizens Advisory Committee (ACAC). Environmental program managers and persons with expertise in specific fields have been invited to provide advice and answer questions on potential management strategies. The managers and experts come from renowned programs and institutions including the N.C. Natural Heritage Program, state and private universities, federal agencies, private industries, and non-profit organizations.

The workgroups will meet during the first week of December on the following schedule:

Tues., Dec. 3 2:30-6:30

Fisheries Productivity
SAV, Fisheries Habitat
Cultural Integrity/Public Involvement

Wed., Dec. 4
Fisheries Diseases
Biological Integrity, Toxics
Population Growth

Thurs., Dec. 5 9:30-2
Wetlands
Dissolved Oxygen, Nutrients

Thurs., Dec. 5 2:30-6:30
Critical Habitat
Sediment, Turbidity, Salinity, Bacteria

The Study staff will produce "issue papers" based on these meetings that outline the suggested management strategies for each concern. The issue papers will serve as the foundation for the CCMP.

All of the workgoup meetings will be held at the Washington Regional Office of the Department of Environment, Health and Natural Resources. Public participation is encouraged in this critical stage of CCMP development. Call Joan Giordano at (919) 946-6481 for more information.

A/P STUDY RESEARCH FOCUS

Project: Evaluation of State Environmental Management Programs in the A/P Region Project Leader: Robert Nichols, Research Triangle Institute Report #90-02

Goal of Project - To categorize the environmental management and resource protection programs affecting the A-P region and evaluate their effectiveness. The purpose of the project was to provide an overview of programs to help determine how the the A/P Study's Comprehensive Conservation and Management Plan can best be integrated with existing environmental agencies. (It should be noted that some agencies have already independently addressed problems mentioned here.)

Programs Evaluated -

- 1. point source (direct wastewater discharge) controls
- 2. individual and small septic system controls
- 3. large or community sanitary system controls
- 4. urban stormwater controls
- 5. agricultural runoff controls
- 6. erosion/sedimentation controls
- 7. marina siting and marine waste disposal controls
- 8. critical aquatic habitat protection programs
- 9. wetlands protection programs

Evaluation Criteria - Each of the programs received a "screening-level" evaluation asking these questions:

- is the activity one that can be effectively regulated?
- are program objectives clear?
- is there sound scientific basis for program actions?
- are program funding and staffing sufficient?
- do program incentives and sanctions deter violations?
- -- is the program open to public involvement?
- is adequate technical assistance available?
- is oversight agency committed to program objectives?

Conclusions - The evaluation found that in general the programs had an adequate regulatory structure, but often were not fully achieving their mission due to various problems. Some of the more common problems were:

-- Lack of staff - Virtually every enforcement program reviewed did not have enough staff to provide adequate technical assistance to permit holders or to ensure compliance with permits. Frequent personnel turnover

often compounds problems of staff shortages.

-- Little control over cumulative impacts - Many state environmental programs issue permits in isolation and allow exemptions for smaller projects. This can allow impacts to accumulate without regulatory agencies having a sense of the overall effects. Fragmented authority for oversight of different aspects of an activity adds to this lack of control.

-- Inadequate penalties - Penalties that pose little financial hardship, coupled with the lack regulatory staff, may give permit holders little incentive to meet permit limits. This is exacerbated by frequent appeals of penalties, and by the fact that many violators (e.g., sewage treatment plants) cannot feasibly be shut down, thus limiting the state's ability to deter violations.

-- Shifting standards - Politicized debate over pollutant limits or definitions of natural areas often hampers regulatory agencies' ability to maintain consistent

enforcement in the field.

- Inadequate technical assistance - Overburdened agency staff often don't have the time to give operators of small facilities important information on how to run plants or meet permits more effectively.

A/P Committee News

CITIZENS ADVISORY COMMITTEES
Met: October 29, Washington (joint) Attending: 18 of 60

- ** Re-elected Derb Carter and Ernie Larkin as Chair and Vice-Chair, respectively, of Pamlico CAC. Re-elected John Stallings as Vice-Chair of the Albemarle CAC. Chairmanship of ACAC is not yet decided.
- ** Members were updated by Director Waite on revised CCMP format. Format was revised following discussion over how to best present and organize the plan. CAC members express approval of revised format.
- ** PCAC Chairman Carter emphasized that the November-January period, during which much of the CCMP will be organized, will be a very important window for CAC input, and that members needed to be more active than ever during this time.

POLICY COMMITTEE Met: October 11, Manteo

** Approved revised format for CCMP, which included some suggested changes from CACs. Also tentatively approved two new research projects (pending Technical Committee review), and approved appointing a Virginia representative to PC (see page 4).

Attending: 8 of 11

- ** In lieu of a previously proposed "Summit for the Sounds," the PC reaffirmed its intent to hold a final Annual Meeting in 1992 to serve as a "kick off" for CCMP implementation.
- ** PC also decided that the Study should hold workshops in February 1992 for elected officials and groups that may be affected by the CCMP (such as the agricultural community, industries, etc.) in order to present initial findings and proposed management strategies.

Sound Bittes

news, notes and information about the A/P Study

POLICY COMMITTEE INVITES VIRGINIAN

At its meeting on October 11, the Policy Committee voted to add an official from Virginia to the committee. Currently there are 11 members on the PC, none from Virginia. The Study has invited Elizabeth Haskell, Virginia Secretary of Natural Resources, or a designee to sit on the PC for the Study's final year.

FISH KILL RESEARCH CONSIDERED

A research project examining the role of a dinoflagellate phytoplankton in fish kills in the Pamlico and Neuse rivers is being considered for supplemental funding by the A/P Study.

Dr. JoAnn Burkholder, a professor at N.C. State University, has been independently researching the effects of a toxic dinoflagellate found in Water samples taken during Pamlico and Neuse kills. The organism had been observed several years ago, but was discounted as a factor in fish kills because it was not present in large numbers. However, Dr. Burkholder's research has found that even small numbers can kill fish.

Another independent research effort of Dr. Burkholder's, examining the effects of nitrate enrichment on submerged aquatic vegetation, is also being considered for funding by the A/P Study.

THE ADVOCATE...

is the newsletter of the Albemarle-Pamlico Estuarine Study, a five-year project funded jointly by the US EPA and the State of North Carolina, intended to develop an environmental management plan for the Albemarle-Pamlico estuarine system. The Study, which will conclude in 1992, is part of the EPA's National Estuary Program. It is being conducted within the N.C. Dept. of Environment, Health, and Natural Resources, POB 27687, Raleigh, NC, 27611-7687.

William W. Cobey Jr. (919) 733-4984 Secretary, NC DEHNR

Randall Waite (919) 733-0314 A/P Study Program Director

Joan Giordano (919) 946-6481 A/P Study Public Involvement Coordinator

The Advocate is produced for the A/P Study by the Pamlico-Tar River Foundation, POB 1854, Washington, NC. (919) 946-9492. Tom Stroud, Editor.

CITIZEN MONITORING MAKES LINK

The A/P Study's Citizens' Water Quality Monitoring Program recently established a "remote data access link" with the state's Center for Geographic Information and Analysis (CGIA) in Raleigh. By linking up with CGIA, the program can now make its data available to resource managers across the state. This effort marks the first time that remote access has been set up with CGIA.

Citizens' Monitoring is directed by Robert Blinkoff out of East Carolina University. Volunteers in the program take and test water samples weekly to help provide a broad picture of water quality in the A-P region.

Persons interested in participating in the program can contact Robert Blinkoff at (919) 757-6220.

TO GET ON ADVOCATE MAILING LIST

To get on or off the mailing list, or to make a change to your address, write to <u>Advocate</u>, POB 1507, Washington, NC, 27889.

COMMITTEE MEETINGS, DECEMBER-JANUARY Policy December 4, Washington, Holiday Inn The public is welcome at all Study meetings. Call (919) 946-6481 for agenda specifics.
